

## DRILL TRAILER BW-300

Order no. 30001150

The BW-300 is particularly suitable for taking test cores from asphalt or concrete pavements. At airfields, the drill rig is used to drill holes for underfloor runway lighting. With the BW-300 you drill independently of any supply line.

- Drilling feed, lifting and lowering of the drilling platform hydraulically
- Hydraulic control panel can be mounted on the left or right side
- 2-speed drilling gear
- stainless steel water tank with large filling opening
- Mechanical water pump
- All-round warning light
- Petrol engine with electric starter
- Overrun brake with automatic reversing system
- Large storage box
- Ball hitch
- TÜV approval for road traffic

Technical data		BW-300
Max. drill-Ø	mm	400
Max. lifting	mm	600
Max. usable length of drill bit	mm	550
Drill bit connection		1 1/4" UNC-pin
Motor output	kW	7,6
Motor type		Honda GX-390 (petrol)
Contents water container	l	300
Water pump		mechanical
Drive of drill bit		mechanisch, 2 speed gear
Dimensions L/W/H	mm	3300 / 1660 / 1800
Weight (unloading/permisible)	kg	700 / 1200
Suction system		no
Self-driving		no

### Accessoires BW-300

Description	Order nor.
Immobilizer BW-300 - Only factory assembly for new machine order	50006393
Centering device BW-300 - only factory assembly with new machine order	30000865

Subject to technical and optical changes and further developments.
