

DRILL TRAILER BW-400

Order no: 30001137

The fully hydraulic BW-400 is particularly suitable for taking test cores from asphalt or concrete pavements. At airfields, the drill rig is used to drill step holes for underfloor runway lighting. With the BW-400 you drill independently of any supply line.

- 2-cylinder Hatz diesel engine with sound insulation hood
- Hydraulic drill feed, lifting and lowering of the drilling platform infinitely variable speed
- Stainless steel water tank with large filler opening
- Switchable electric water pump
- Reversing brake with automatic reverse
- All-round warning light and large storage box
- Ball hitch
- TÜV approval for road traffic

Technical data		BW-400
Max. drill-Ø	mm	400 / 600*
Max. lifting	mm	600
Max. usable length of drill bit	mm	550
Drill bit connection		1 1/4" UNC-pin
Motor output	kW	15,5
Motor type		Hatz 2 G 40 (petrol)
Contents water container	l	300
Water pump		electrical
Drive of drill bit		hydraulic
Dimensions L/W/H	mm	3300 / 1700 / 1830
Weight (unloading/permisible)	kg	920 / 1500
Suction system		no
Self-driving		no

*) Distance plate type T required

Accessoires drill trailer BW-400

Description	Order no.
Collision protection BW-400 - only assembly at works for new machine order	50009367
Centering device BW-400 - only assembly at works for new machine order	50009368
Demolition hammer	50001132
Hydraulic motor H-100 for drilling Ø 80 - 300 mm in concrete, up to 400 mm in asphalt	30001036
Hydraulic motor H-230 for drill-Ø 300 - 600 mm (distance plate type T required)	30001035
Distance plate type T for drill-Ø > 400 - 600 mm	30000699

Subject to technical and optical changes and further developments.
