

## DRILL TRAILER BW-443

Order no. 50008892

The fully hydraulic **BW-443** is particularly suitable for taking test cores from asphalt or concrete roadways or for drilling openings for crash barriers. At airfields, the drill rig is used to make stepped holes for underfloor runway lighting. With the **BW-443** you drill independently of any supply line.

Technical data		BW-443
Max. drill-Ø	mm	400
Max. lifting	mm	600
Max. usable length of drill bit	mm	550
Drill bit connection		1 1/4" UNC-pin
Motor output	kW	8,7 + 15,5
Motor type		Honda GX-390 + Hatz 2 G 40 (petrol) + (fuel)
Contents water container	l	300
Water pump		electrical
Drive of drill bit		hydraulic
Dimensions L/W/H	mm	4541/1815/2470(1870)
Weight (unloading/permisible)	kg	1300 / 1800
Suction system		4.3 mechanical
Self-driving		yes, hydraulic drive

- Horizontal drill head adjustment  $\pm 100$  mm
- Self-propelled on the construction site due to fold-out drive wheel
- Suction device
- Underride guard
- Approval up to 100 km/h with green licence plate (tax saving!)
- Built-in dampers for comfortable driving
- Height-adjustable drawbar with exchangeable ball head and ring eye coupling for transport by car or truck
- Al-Ko AAA axle

Subject to technical and optical changes and further developments.
